FIBER OPTIC CABLELING CAPABILITIES

Design • Engineering • Installation • Maintenance

visit us online at www.ietsystems.com
The use of fiber optic cabling in communications has become more widespread as technology continues to become more advanced. Fiber optic cabling is more reliable and durable than other types of cabling systems and can also produce a higher bandwidth for optimal performance in all areas of communications, such as networking, video streaming and VoIP phone systems. Signals can be carried over a greater distance, allowing for higher quality transmission. IET Systems has a wealth of experience improving companies’ communication networks with the installation and maintenance of fiber optic cabling systems.

IET Systems is a full-service provider for fiber optic cabling. From installation to maintenance and everything in between, our technicians at IET Systems are highly skilled and experienced in tackling even the most complicated fiber projects. Our cost-effective design, installation and maintenance services meet all of the current industry standards and will have your network up and running in no time. Let IET Systems see your fiber optic cabling project through, from beginning to end!

For more information on how IET Systems can address your fiber optic needs, contact us at (800) 984-8054 or e-mail sales@ietsystems.com.
As a full-service fiber optic cabling provider, IET Systems offers complete cable placement services for both underground and aerial installations. Following a thorough site survey, our technicians will design a cable placement plan and provide documentation once the job is complete. Our placement services include the following:

- Duct and cable plowing
- Placement of inner ducts and manholes
- Placement of fiber optic cable
- Metro and long-haul installs
- Placement of micro fiber and micro ducts
- Duct proofing
- Rodding

In addition to our cable placement services, we offer an array of other services to fully address all of your fiber optic needs, including:

- Fusion and/or mechanical splicing
- Full testing, including, but not limited to, end to end, reel, splice loss and power meter testing
- Connectorization and polishing
- In-service hot cuts
- Custom cable assembly
- Project and safety management
- Site maintenance
IET Systems is a recognized leader in full-service systems integration for security, surveillance and communications. With headquarters in Mobile, Alabama we provide our clients with over 20 years of unparalleled knowledge, experience and support, keeping their operations running smoothly, efficiently and, most importantly, safe and secure.

Our team at IET Systems is uniquely qualified to design, engineer, install and maintain all types of systems in security, surveillance and communications. From start to finish, IET Systems can tackle your most demanding projects with precision, quality and safety in mind.

IET Systems is heavily involved in the government, military and industrial sectors, but also serves many companies and organizations in the commercial, healthcare and retail markets. We are proud of our reputation to provide customized solutions in these industries, where the operational needs are ever-changing.
